### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4, 12 and 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding the claims 4, 12 and 19, the claims refer to a "second series of resilient members" however the parent claim lacks the teaching of a first series of resilient members, therefore it is not clear how many resilient members are actually being claimed.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Gomi '347. Gomi discloses a die and multi-pass forging machine containing all of the claimed elements including with reference to claims 1, 8-9 and 16, a die insert (members 114 and 117), a retainer ring (members 148, 149 and 150), a punch insert (153). An adaptor

(146), as required by claims 2, 10 and 17, is shown in figure 22. Resilient members, as required by claims 3-4, 11-12 and 18-19, are shown as springs 158. A stopper and tab, as required by claims 5-6, 13-14 and 20-21, are read onto the inner facing projections of member 149 (held by member 148) and the wide portion of member 153 (shown as portion surrounded by member 148) which abuts against them, as shown in figure 22. A die insert including a relief which slidably receives an end of the retainer ring, as required by claims 7, 15 and 22, is shown in figures 22 and 24. With respect to claim 16, Gomi discloses a multi-pass forging machine (figure 14) comprising a first pass die (X101) and a finish pass die (figure 22).
